

# Solar container lithium battery pack notice

## Overview

---

How are lithium ion batteries packaged?

Each battery or cell must be entirely enclosed to prevent contact with other equipment or any conductive materials. The inner packaging containing lithium ion batteries can be placed in containers crafted from various materials, including metal, wood, fiberboard, or solid plastic jerrycans.

How should lithium ion batteries be shipped?

According to the DOT, lithium ion batteries must be shipped in a manner that protects against: As a standard guideline, metallic inner packaging for lithium ion batteries is prohibited. Each battery or cell must be entirely enclosed to prevent contact with other equipment or any conductive materials.

Do lithium ion batteries need packaging regulations?

Lithium ion batteries, essential for a multitude of devices and applications, are subject to stringent packaging regulations set by the U.S. Department of Transportation (DOT).

What are the shipping requirements for lithium batteries?

Some general shipping requirements to transport lithium batteries internationally include: Lithium batteries weighing over 35kg must be approved by the national authority of the shipping and destination country before shipment. Defective or damaged lithium batteries must not be transported.
