

# Solar container lithium battery power station in Croatia

## Overview

---

Summary: As Croatia's coastal hub Split accelerates its renewable energy adoption, customized lithium battery systems are emerging as critical solutions for stabilizing solar/wind power and optimizing energy costs.

Summary: As Croatia's coastal hub Split accelerates its renewable energy adoption, customized lithium battery systems are emerging as critical solutions for stabilizing solar/wind power and optimizing energy costs.

The annual electricity production of the Bokšić solar power plant is estimated at just under 120 GWh. The facility, with a planned connection power of 89 MW, would be connected to the grid through a new 110/33 kV transformer station, and then to the existing 110 kV Našice-Slatina transmission line.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

Croatia's Ministry of Environmental Protection and Green Transition has initiated the process to determine if a full environmental impact study is necessary for the proposed 99 MW Bokšić solar power plant, which will include an integrated battery energy storage system (BESS). Once operational, the

Following the 2020 commissioning of Vis SPP, we developed, manufactured and installed a 1 MW battery storage system that can store 1.44 MWh of electricity. In September 2020, KONČAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we contracted

With its strategic location in Southeast Europe and abundant solar/wind resources, Croatia offers a unique landscape for energy storage. In recent years, energy storage power stations in Croatia have gained momentum, driven by the country's commitment to renewable energy integration and grid.

To balance its grid, Croatia is adopting multiple storage solutions: In 2022, a hybrid solar-storage project on Cres Island reduced diesel generator usage by 70%. The system includes: Croatia's National Recovery and Resilience Plan allocates €1.1

billion for energy transition projects, including:.
