

Solar energy storage cabinet foreign trade

Overview

Are Chinese solar products undercutting the US?

The tariffs, which will apply to certain solar products made by Chinese companies in Southeast Asia, kicked in at a moment of growing global concern about a surge of cheap Chinese solar products that are undercutting U.S. and European manufacturers.

Are US solar companies still struggling to survive?

But U.S. solar companies say they are still struggling to survive as competitors in China and Southeast Asia flood the global market with solar panels that are being sold at prices far below what American firms need to charge to stay in business.

What happened to solar panels after Biden paused tariffs?

In the two years since the Biden administration made the decision to pause the tariffs, solar prices have cratered, and solar panel imports have surged.

Will the lifting of the tariff holiday affect solar companies?

“We don’t expect that the lifting of the tariff holiday will have much of an impact because the Chinese-owned and Chinese-headquartered companies have already adjusted their manufacturing to avoid the circumvention case,” said Timothy Brightbill, a lawyer at Wiley Rein who is representing the U.S.-based solar manufacturers in the newer case.
