

Solar power satellite factory in Myanmar

Overview

The Myanmar Investment Commission has approved the solar panel manufacturing project in Mandalay, which will be developed by Thailand's Mono Sun Co., Ltd. at the Myotha Industrial Park.

The Myanmar Investment Commission has approved the solar panel manufacturing project in Mandalay, which will be developed by Thailand's Mono Sun Co., Ltd. at the Myotha Industrial Park.

Myanmar has approved a significant investment for a solar panel manufacturing project in Mandalay, aiming to enhance the country's renewable energy infrastructure and local production capabilities. The Myanmar Investment Commission has approved the solar panel manufacturing project in Mandalay.

Myanmar Prime Minister Min Aung Hlaing called for greater domestic production of solar panels and raw materials during a recent visit to a factory in central Myanmar, citing the need to strengthen local supply chains for renewable energy. Image: Myanmar Ministry of Information Myanmar Prime.

The Senior General stressed the need to generate electricity through solar power, both on a manageable scale and a commercial scale, to operate factories. If so, these factories can reduce production costs. Businesspeople must be encouraged with incentives to invest in generating electricity.

State Administration Council Chairman Prime Minister Senior General Min Aung Hlaing observes solar panels produced at the Solar Panel Factory of Shwe Katha Company Limited under the Electronic Accessories and Electric Motor Workshop of the No 2 Heavy Industries Enterprise in Yangon Region.

Solar power in Myanmar has the potential to generate 51,973.8 TWh/year, with an average of over 5 sun hours per day. Even though hydropower is responsible for most electricity production in Myanmar, the country has rich technical solar power potential that is the highest in the Greater Mekong.

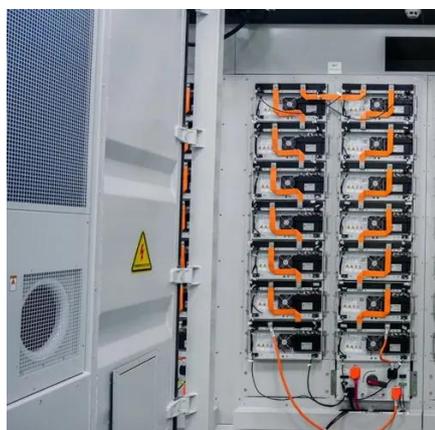

Burma's (Myanmar's) electricity generation mainly depends on gas and hydropower, while renewable sources such as solar and wind contribute merely one percent to the overall output. However, residential solar systems have gained

significant popularity and widespread adoption since the year 2022. Due.
