How does Iberdrola support energy storage?

In terms of energy storage, Iberdrola sees it as a key driver of decarbonisation and the energy transition, enabling large-scale and small-scale storage through pumped storage and lithium-ion battery technology to support the electrification of the energy system.

Why do we need energy storage solutions?

Electricity is a resource easy to generate, transport and transform, but its storage is a constant challenge in today's energy landscape. In order to make the production of renewable energy more flexible and ensure its integration into the system, storage solutions have been developed. This avoids wasting energy in times of low demand.
