We offer a selection of electric double-layer capacitors (EDLCs), lithium ion capacitors, and miscellaneous types. A supercapacitor is a double-layer capacitor that has very high capacitance but low voltage limits. Supercapacitors store more energy than electrolytic capacitors and they are rated in.

Ceramic capacitors, made from ceramic materials as the dielectric, are widely used in high-frequency applications such as RF circuits, decoupling, and bypass applications due to their small size, low cost, high stability, and wide range of values. Multilayer ceramic capacitors (MLCCs) are a type of.

Capacitors, those indispensable components in electronic circuits, come in an astonishing variety at Jaycar. Our selection spans electrolytic, ceramic, tantalum, and many more, ensuring every project finds its perfect match. With values expressed in farads and tolerances marked, sourcing the.

Electric double layer capacitors are two-terminal energy storage devices that collect voltage as current flows through an electric circuit. They generate an electrical field between two conductor plates and are also known as supercapacitors. RS offer an extensive range of high-quality double layer.
