

Tallin Super Farad Capacitor

Overview

Typical applications include hybrid battery packs, UPS & telecommunication systems, holding up power, high pulse current. Super Capacitor designed for hybrid battery packs, UPS and telecom systems, hold power, quick charge and discharge, very high capacitance.

Supercapacitors also known ultracapacitors and electric double layer capacitors (EDLC) are capacitors with capacitance values greater than any other capacitor type available today. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance.

Smart Filtering As you select one or more parametric filters below, Smart Filtering will instantly disable any unselected values that would cause no results to be found. Please modify your search so that it will return results. To use the less than or greater than function, please select a value.

Electric double-layer capacitors also known as supercapacitors or ultra capacitors are charge storage devices for electrical energy. The formation of an electric double-layer capacitor is composed of carbon electrodes or derivatives of higher electrostatic double-layer capacitance, an electrolyte.
