A Microinverter or a Solar micro-inverter is an extremely small device used to convert DC to AC. These inverters are so small that they are used as plug-and-play. Microinverters work remotely with every panel. This is advantageous in case of panel failure or power surge. These inverters work on.

PCS is a leader in Sustainable Energy solutions, primarily in solar-battery and solar-hybrid systems. With local experience in both ongrid and offgrid solutions for residential and commercial sites, our design engineers are well-postured to customise a power solution to meet all customers needs.

TSUN offers solar solutions for residential installations. With more than 10 years solar inverter design and manufacturing experience, TSUN focuses in safe and high efficiency micro inverter technology development, and keeps iterating micor inverter . TSUN offers solar solutions for residential.
