

Waterproof Folding Container for Field Research

Overview

These modular container labs are ideal for environmental monitoring, clinical trials, and remote data collection, offering 20 ft. and 40 ft. containers that are weather-resistant, quickly deployable, and easily customized to specific research needs.

These modular container labs are ideal for environmental monitoring, clinical trials, and remote data collection, offering 20 ft. and 40 ft. containers that are weather-resistant, quickly deployable, and easily customized to specific research needs.

These modular container labs are ideal for environmental monitoring, clinical trials, and remote data collection, offering 20 ft. and 40 ft. containers that are weather-resistant, quickly deployable, and easily customized to specific research needs. At Container Sales Group, we provide new, used.

Easy Access Storage Co. Inc. offers a smart, scalable solution: shipping container units customized for scientific research, lab testing, and environmental monitoring. Built tough to withstand Canada's diverse climates, our containers provide a secure, mobile platform for critical data collection.

Container-based laboratories are modular, portable research environments built within shipping containers or similar structures. These labs are designed to be self-sufficient, with built-in utilities such as power, water, and air filtration. Unlike traditional labs in fixed facilities.

Biotop Science Labs (Global): Biotop Science specializes in establishing cutting-edge bio labs housed in shipping containers, contributing significantly to pioneering scientific endeavors. The precise locations of these labs may vary based on the research initiatives they support. Papua New Guinea.

Used to transport important medical equipment, these ECS containers are designed to be virtually indestructible. Complete with all the features you want in a storage container; thick rubber gasket that create a watertight and airtight seal, wing style latches, and pressure relief valve. Spring.

Shipping container labs are exactly what they sound like fully equipped laboratories housed within repurposed shipping containers. They've been around for a little while now but recently their popularity has surged. It's easy to see why

when you consider the benefits: they're portable.
