

# What is the price of solar power generation system

## Overview

---

The average cost of solar panels ranges from \$2.50 to \$3.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. After applying the 30% federal tax credit, net costs typically range from \$10,500 to \$24,500.

The average cost of solar panels ranges from \$2.50 to \$3.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. After applying the 30% federal tax credit, net costs typically range from \$10,500 to \$24,500.

As of 2026, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type.

Switch to solar with a system built for you. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after.

What impacts the cost of your solar panel system?

Is solar worth the price tag?

Are there hidden solar panel costs?

How should you pay for solar?

If you've been putting off solar because of sticker shock, this might change your mind: Most homeowners save \$37,000 to \$148,000 over 25 years. While.

**Historic Low Pricing:** Solar costs have reached unprecedented lows in 2025, with systems ranging from \$2.50-\$3.50 per watt installed, making the technology more accessible than ever before. **Federal Tax Credit Urgency:** With Congress proposing to end the 30% federal tax credit after 2025, homeowners.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs.
