

Wholesale bess storage system in Latvia

Overview

Where are Bess projects being implemented?

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and continuing with larger storage solutions, including at Riga HPP and Latvenergo AS CHPP-2. The procurement and selection of suppliers for the latter projects is currently in progress.

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Will Bess be able to deploy storage capacity across Baltic states?

"Future projects will be carefully evaluated to strategically deploy storage capacities across the Baltic states in order to maximise the benefits for the security of supply and customers," the company added, giving a broad hint that it will also be looking to place BESS assets in Estonia and Lithuania.

How will Latvenergo improve the security of supply?

The innovations and infrastructure of Latvenergo will not only strengthen the security of supply but also the development of the Baltic region." BESS, or Battery Energy Storage System, is a technology that allows electricity to be stored with the objective of feeding it back into the grid at times of peak demand.
